Re: Repeal of 20.11.41 NMAC, *Authority-to-Construct* and replacement with 20.11.41 NMAC, *Construction Permits*

Dear Stakeholders:

The Air Quality Division (Division) of the City of Albuquerque's Environmental Health Department is proposing that the Air Quality Control Board repeal regulation 20.11.41 NMAC, *Authority-to-Construct,* and replace it with 20.11.41 NMAC, *Construction Permits*. As you may recall, the Division had a similar proposal in 2008 which, for a number of reasons, did not go to hearing. The draft before you is a replacement draft and is referred to as the 1st Amended Public Review Draft (PRD) for Stakeholder Review, and shows changes from the 2008 PRD. The newly proposed version is available on the Division website at http://cabq.gov/airquality/regulation-development/stakeholder-review-drafts, and a summary of the proposed changes is attached to this letter.

As a stakeholder in the preparation, adoption and implementation of this regulation, your review and input is valued. Please send your comments by August 17, 2012 via e-mail to nbutt@cabq.gov, or mail them to Neal Butt, City of Albuquerque, Environmental Health Department, P. O. Box 1293, Albuquerque, New Mexico 87103.

Thank you for your interest in this matter. Feel free to contact me if you have any questions.

Sincerely,

Neal Butt
Environmental Health Scientist
Control Strategies Section, Air Quality Division

Comparison Summary of Current and Proposed Albuquerque-Bernalillo County Air Quality Control Board Regulation for Minor Air Quality Permitting Actions
July 17, 2012

This summary highlights some of the proposed significant changes to the 20.11.41 NMAC.

Current Regulation 20.11.41 NMAC	Proposed Regulation 20.11.41 NMAC 1st Amended Public Review Draft 6/26/12	Purpose of Proposed Change or Addition
Does not address when a new owner acquires a source that does not have an air quality permit, but the source requires an air quality permit.	A new owner who operates a source that requires an air quality permit, but does not have a permit will be required to obtain an air quality permit. *See Subparagraph (2) of Subsection A of 20.11.41.2 NMAC.*	An air quality permit must be obtained when a new owner acquires and operates a source that requires an air quality permit, but an air quality permit has not been issued to the source.
No requirement for a person to apply for and obtain an air quality permit when the source becomes subject to a new federal standard (New Source Performance or National Emission Standards for Hazardous Air Pollutants).	Requires a person to apply for and obtain an air quality permit when the source becomes subject to a new federal standard (New Source Performance or National Emission Standards for Hazardous Air Pollutants). *See Subsection D of 20.11.41.2 NMAC*	Informs permittees about the federal standards that apply to their source and enables the Department to more efficiently incorporate the federal standards in the permit as required by federal law.
No exemptions	Provides an exemption from air quality permitting activities, including: • maintenance of grounds, etc. • maintenance of equipment • exhaust emissions from forklifts, etc. • use of firefighting equipment and training • government military activities such as field exercises • use of portable aerospace ground equipment • use of portable construction equipment such as power generation equipment & heaters. • gases used to calibrate plant instrumentation • smaller fuel burning equipment for heating building for personal comfort. *See Subsection F of 20.11.41.2 NMAC*	The exemptions are authorized by federal law and enable the Department and the permittee to focus on the more significant air emissions at a source.
"Pre-controlled emission rate" is used to determine whether a permit is required.	"Potential emission rate" is used to determine whether a permit is required emission thresholds.	Use of "potential emission rate" makes the regulation consistent with both the State of New Mexico

Current Regulation 20.11.41 NMAC	Proposed Regulation 20.11.41 NMAC 1st Amended Public Review Draft 6/26/12	Purpose of Proposed Change or Addition
See Subsection Q of 20.11.41.7 NMAC	*See Subsection HH .of 20.11.41.7 NMAC*	Air Quality Control Act definition and the "potential to emit" federal Environmental Protection Agency definition. *See NMSA 1978 Section 74-2-2.P and 40 CFR §52.21(b)(4).*
No pre-application meeting required	The applicant is required to participate in a pre-application meeting with the Department *See Subsection A of 20.11.41.13 NMAC*	The pre-application meeting will allow the applicant to better understand the permitting process and the Department to better understand the proposed project.
No public notice requirements for applicant	The applicant is required to conduct the following public notice before submitting an application for a new permit or permit modification: • Send a copy of the public notice to the closest neighborhood association and the closest neighborhood coalition • Post and maintain a weather-proof sign at a visible location at the site or the proposed site until the Department makes a final decision regarding the application. *See Subsection B of 20.11.41.13 NMAC*	The applicant providing public notice to the neighborhood association and the neighborhood coalition provides early awareness regarding the proposed project in their neighborhood. Posting of the sign provides early awareness to nearby neighbors regarding the proposed project.
Department publishes a public notice in a local newspaper of general circulation and provides the public with has at least 45 days to comment. *See Paragraphs (3) and (4) of Subsection A of 20.11.41.14 NMAC*	Department conducts the following public notice: • Publishes public notice in the newspaper of largest circulation with 30 days for public comments to be submitted • Sends a copy of the public notice to the closest neighborhood association and closest neighborhood coalition • Provides notice to all individuals and organizations on the list maintained by the Department *See Subsection B of 20.11.41.14 NMAC*	By providing public notice to the neighborhood association and neighborhood coalition the Department provides information regarding the proposed project in their neighborhood and how comments can be submitted to the Department. Providing public notice to individuals and organizations on the list maintained by the Department provides addition public notice to the community.
Provides all interested persons at least 45 days to submit written comments, evidence, or to request a public hearing on the application. *See Paragraph (4) of*	Provides the public 30 days to submit written comments and evidence. *See Subparagraph (h) of Paragraph (2) of Subsection B of 20.11.41.14 NMAC*	The proposed changes include early notification of the project by the applicant and posting of a sign prior to the applicant's submittal of the application. The Department provides enhanced notification by

Current Regulation 20.11.41 NMAC	Proposed Regulation 20.11.41 NMAC 1st Amended Public Review Draft 6/26/12	Purpose of Proposed Change or Addition
Subsection A of 20.11.41.14 NMAC		sending the public notice to the closest neighborhood association and closest neighborhood coalition. Therefore, 30 days is sufficient time for the public to submit written comments and evidence and is consistent with the federal Environmental Protection Agency requirements. *See 40 CFR §51.161(b)(2).* The New Mexico Air Quality Control Act requires the Department to make the final decision regarding a pending application within 90 days after the application is determined to be administratively complete (unless extended for an additional 90 days under specific circumstances), and the Department must have time to consider and potentially research public comment before the Department makes a final decision. NMSA 1978 §74-2-7(B)(2)(a).
Final action on an application must be taken by the Department within 120 days or 180 days if a public hearing has been called from the date the application was ruled complete. *See Subsection C of 20.11.41.15 NMAC*	Final action on an application must be taken by the Department within 90 days after the Department has determined the application is administratively complete unless the Environmental Health Department Director grants an extension for not more than 90 days for good cause, including scheduling a public information hearing. *See Subsection B of 20.11.41.16 NMAC*	Makes the Albuquerque-Bernalillo County Air Quality Control Board construction permitting regulation consistent with the State of New Mexico Air Quality Control Act requirement. *See NMSA 1978 Section 74-2-7.B(2)(a).*
There is no permit term and the air quality permits do not expire.	Air quality permits will be valid for 10 years and must be renewed. *See Subsection E of 20. 11.41.19.NMAC*	Renewal of permits will enable the Department to incorporate any new air quality requirements and remove old, outdated requirements from the air quality permit.
No time limit established for temporary relocations of portable stationary sources	Establishes a time limit of 365 consecutive days for temporary relocation of a portable stationary source. *See Subsection A of 20.11.41.23 NMAC*	Time limit for consecutive days is needed for how long a temporary portable stationary source can remain at one location.

Current Regulation 20.11.41 NMAC	Proposed Regulation 20.11.41 NMAC 1st Amended Public Review Draft 6/26/12	Purpose of Proposed Change or Addition
No public notice and no posting of a sign are required for temporary relocation of portable stationary sources.	Permittee must post and maintain a weather-proof sign at a visible location at the proposed site prior to submitting the application for temporary relocation of a portable stationary source and keep the sign posted until the Department makes a final decision regarding the relocation request. The Department may require the permittee to provide a public notice to the closest neighborhood association and neighborhood coalition. *See Subsection D of 20.11.41.23 NMAC*	Posting of the sign prior to the relocation provides notice to nearby neighbors of the proposed relocation site. The Department can require the permittee to also provide public notice to the closest neighborhood association and the closest neighborhood coalition.
No public notice is required for Emergency Permits. *See 20.11.41.22 NMAC*	If the Department issues an emergency permit the Department will: • publish public notice in the newspaper with the largest general circulation in Bernalillo County • provide notice to the closest neighborhood association and the closest neighborhood coalition. • provide notice to all individuals and organizations on the list maintained by the Department. *See Subsection C of 20.11.41.24 NMAC*	Public notice is required for emergency permits in order to be consistent with Environmental Protection Agency requirements for minor new source review permitting programs. *See 40 CFR §51.161(b)(3).*
No provisions for a permittee to request technical permit revisions and no provisions for the Department to approve technical permit revisions.	Technical permit revisions can be requested by the permittee and approved by the Department. *See Subsection B of 20.11.41.28 NMAC*	Technical permit revisions allow for changes to be made to the air quality permit which do **not** increase emissions and do **not** reduce the enforceability of the permit. Examples: a permittee requests a voluntary reduction of an emission limitation or a permittee requests to retire an emission unit.
No provisions for general Authority-to-Construct permits (construction permits).	General construction permits forms can be developed and revised and general permits can be issued by the Department for similar operations, processes, and emissions. *See 20.11.41.31 NMAC*	General construction permits will allow the Department to develop a more efficient and consistent permitting process for similar operations, processes, and emissions. The New Mexico Environmental Improvement Board minor permitting regulation provides for

Current Regulation 20.11.41 NMAC	Proposed Regulation 20.11.41 NMAC 1st Amended Public Review Draft 6/26/12	Purpose of Proposed Change or Addition
		general permits which have been used by the New Mexico Air Quality Bureau for about 13 years. 20.2.72.220 NMAC
No provisions for accelerated review of application.	Accelerated review of application can be used by the Department if the applicant complies with the requirements. *See 20.11.41.32 NMAC*	The State of New Mexico Air Quality Control Act requires the local board (Albuquerque-Bernalillo County Air Quality Control Board) to have a regulation that provides a method of accelerated permit processing for construction permit applications. *See NMSA 1978 Section 74-2-7.B(8).*
