

City Councilor Isaac Benton invites you to a public meeting on
Thursday, December 6 at 6:30 pm
in the Manzano Day School Cafeteria (1801 Central NW)
regarding the West Central Avenue Project.

The City will present the results of the 3-lane roadway configuration project that was implemented on Central Avenue between 8th Street and San Pasquale Avenue in May of 2011.

There will also be a discussion of other improvements proposed for the corridor, west of San Pasquale to 47th Street, such as reconfiguration of the Central/Lomas intersection, enhanced pedestrian crossings, and wider sidewalks.

Your feedback is critical and will help inform design and funding decisions for making permanent improvements. Please join us to continue the important work of reinvesting in this historic part of the Central Avenue corridor!

For more information on the history of this project, visit:
