

FOUR HILLS PARK

Many in the Four Hills Community expressed the need for a park and survey results confirmed the strong support for a park in the area. After substantial community input, the Parks Department learned that the Four Hills community was interested in building a water friendly park that provided a comfortable atmosphere for residents of all ages.

Construction crews broke ground earlier this summer and will continue to work through the end of the year. The Four Hills Village Park was designed with sustainability in mind. We hope this park will use approximately HALF the water of a traditional park with no large grass area and retention of water runoff. Two shade structures and heavy tree canopy, once mature, will provide extensive shade. The Parks Department has designed the park to accommodate a variety of activities for both children and adults including a basketball half-court with seating, walking paths with exercise stations, play areas designed to be integral to the park itself and provide a variety of experiences, benches for resting and enjoying the views, picnic tables, a drinking fountain and a mutt-mitt station. The Four Hills Park is scheduled to be completed by the beginning of 2015.
