

CITY OF ALBUQUERQUE'S 2024 CAPITAL PRIORITIES

Expand Real Time Crime Center and Police Technology

Legislative Council Services (LCS) ID #1046

ICIP# 36874

Background

The Real Time Crime Center has proven to be an invaluable tool for the Albuquerque Police Department's crime-fighting efforts. As the center has expanded, APD needs to broaden and integrate these technologies throughout the full metro area. APD seeks to create a center that would enable partners to share their informational, technological and subject matter expertise towards the common goal of lowering crime across the State.

This funding would create a true Fusion Center for the metro area, with interoperable software for all agencies to integrate CAD and RMS systems, and would fund violent crime investigative units to expand investigations and apprehension resources like the Digital Investigation Team (DIT), Radar, Star Chase Equipment, and integrating drone technology.
